

Math Concepts for Students:

Length

CV0886,
I 7:34 dk 0528 2004
Highlights the uses of length,
recounts how countries and cultures
have customized length
measurements, and covers the metric
system and the speed of light.

**The Ultimate Geography Starter
Collection: Earth's Physical
Features**

CV1601,
P-I 11:36 dk 0528 1999
Discusses divisions of the planet
(oceans and landmasses) and
illustrates major landforms, including
hills, mountains, lakes, and plains.
Covers the seven continents, shoreline
shapes, and natural and human
processes that alter landscape.

What Is Science?

CV1311,
J-H 25:18 dk 0528 1996
Shows how scientists organiza,
analyze, and classify data in order to
develop hypotheses and prove or
disprove theories. Profiles such
figures as Mendeleev, Darwin,
Einstein, Rutherford, Dalton, Newton,
Becquerel, and more.
